These are the most important changes to your health insurance in 2027.

Changes to the basic insurance
Basis Zeker

In 2027, the **mandatory excess** will be €400. For more information about the excess and the option to pay the excess in instalments, visit zk.nl/eigenrisico.

For some care covered by the basic insurance, you pay a **statutory personal contribution**. Or a **maximum statutory reimbursement** applies. For example, for patient transport or a wig. The government decides which care requires a personal contribution and how much this amount is. Read more about this at zk.nl/eigenbijdrage. In 2027, the statutory personal contribution or maximum statutory reimbursement will change for a number of reimbursements. Therefore, always check zk.nl/vergoedingen first and look up your reimbursement. This way, you will always know where you stand.

If you choose a **voluntary excess** in 2027, first check zk.nl/eigenrisico. After 12 November 2026, you can see there what discount you will receive if you choose a voluntary excess in 2027.

If you choose to pay the **premium every six months or once a year** in 2027, first check zk.nl/betaaltermijn. After 12 November 2026, you can see there what discount you will receive if you pay your premium in advance.

If you have a **personal budget** (Zvw-pgb), we will inform you separately about the changes to the Zvw-pgb Regulations. After 12 November 2026, you can also find these changes on zk.nl.

You sometimes need prior approval for **follow-up treatment in mental healthcare**. Are you receiving treatment without admission from one or more mental healthcare providers that do not have a contract with us? And do we reimburse more than €4,000 for this treatment? Then from 1 January 2027, you will need our approval for further treatment. Does your healthcare provider believe that follow-up treatment is medically necessary? Then you can submit an application together. We will assess this application based on the treatment guidelines of the professional association.

Good news: With retrospective effect from 1 January 2026, you do not pay any mandatory or voluntary excess for:
- **pelvic physiotherapy for urinary incontinence** (up to 9 treatments);
- **physiotherapy provided by a physiotherapist or Cesar/Mensendieck exercise therapist for osteoarthritis of the hip or knee** (up to 12 treatments within 12 months). This only applies if you go to a healthcare provider with whom we have a contract.

Do you need more treatments? These may be reimbursed from your supplementary insurance. Please check the terms and conditions of your supplementary insurance.

Good news: from 1 January 2027, you will no longer pay any mandatory or voluntary excess for **fall prevention exercise interventions**. This only applies if you go to a healthcare provider with whom we have a contract. This means you can start straight away if this care is needed.

For some **mental healthcare treatments**, we reimburse a lower rate. Are you receiving treatment from a mental healthcare institution that does not have a contract with us? Then, from 1 January 2027, for mild to moderate mental health conditions, we will reimburse a maximum of the rate that applies to treatment provided by (usually) one healthcare professional. This also applies if your healthcare provider charges a higher rate.

You are entitled to a maximum of 2 **fluoride treatments** per year for up to 12 teeth and/or molars per year, from the moment your permanent teeth or molars come through. Do you need a fluoride treatment for more than 12 teeth and/or molars per year, or more than 2 treatments per year? Then you need our prior approval.

For children under the age of 12, new arrangements apply for **patient transport**. Is your child under 5 years old? Then a companion must always travel with them. Is your child aged 5 to 11 inclusive? Then they may only travel alone if a warm handover has been arranged. You are responsible for organising this.

Do you have a severely resorbed edentulous upper jaw, making regular implants impossible? Then you may be eligible for reimbursement for **zygomatic implants** under the basic insurance. You need our prior approval for this treatment. You can read the conditions at zk.nl/voorwaarden.

If, from 1 January 2027, you visit a dentist or dental prosthetist who does not have a contract with us for the **(rebasing or repairing) a full denture or an implant-retained overdenture**, you will receive a lower reimbursement than if you choose a healthcare provider with whom we have agreements. Check zk.nl/zorgzoeker to see which healthcare providers have a contract with us.

If your child receives **sealants**, from 1 January 2027 you will need our prior approval for more than 4 sealants per calendar year. In 2026, this is still required for more than 8 sealants. Your dentist will apply for this approval on your behalf.

If your child under the age of 18 needs **periodontal care** (treatment of the gums) and/or gnathological care (treatment for temporomandibular joint disorders) from a dentist, your child will need our prior approval from 1 January 2027. Your dentist will apply for this approval on your behalf.

From 1 January 2027, you will receive a **hearing aid** as your property instead of on loan. A hearing aid is a personal aid that you often use for many years. That is why we believe it makes more sense for the aid to belong to you. This change brings us in line with how hearing aids are usually provided. Because you will own the hearing aid, the costs will fall under the excess.

For **mental healthcare**, the reimbursement is changing. If you visit a healthcare provider with whom we have agreements, your costs will be fully reimbursed. If you choose non-contracted mental healthcare, from 1 January 2027 you will be reimbursed 70% instead of 75% of the average rate we have agreed with healthcare providers with whom we have a contract. For other non-contracted healthcare providers, your reimbursement will remain the same. You will be reimbursed 75% of the average contracted rate. More information can be found at zk.nl/niet-gecontracteerde-zorg and in the policy conditions.

We charge €1.50 per month if you choose to receive **insurance information by post**, such as bills and claims overviews. This change does not apply to everyone. Customers who will pay this contribution will automatically receive more information about it in 2027. Via zk.nl/digipost, you can view your preference, change it and adjust it again later.

Changes to the basic insurance

Basis Start (Basis Budget)

In 2027, the **mandatory excess** will be €400. For more information about the excess and the option to pay the excess in instalments, visit zk.nl/eigenrisico.

For some care covered by the basic insurance, you pay a **statutory personal contribution**. Or a **maximum statutory reimbursement** applies. For example, for patient transport or a wig. The government decides which care requires a personal contribution and how much this amount is. Read more about this at zk.nl/eigenbijdrage. In 2027, the statutory personal contribution or maximum statutory reimbursement will change for a number of reimbursements. Therefore, always check zk.nl/vergoedingen first and look up your reimbursement. This way, you will always know where you stand.

If you choose a **voluntary excess** in 2027, first check zk.nl/eigenrisico. After 12 November 2026, you can see there what discount you will receive if you choose a voluntary excess in 2027.

If you choose to pay the **premium every six months or once a year** in 2027, first check zk.nl/betaaltermijn. After 12 November 2026, you can see there what discount you will receive if you pay your premium in advance.

If you have a **personal budget** (Zvw-pgb), we will inform you separately about the changes to the Zvw-pgb Regulations. After 12 November 2026, you can also find these changes on zk.nl.

You sometimes need prior approval for **follow-up treatment in mental healthcare**. Are you receiving treatment without admission from one or more mental healthcare providers that do not have a contract with us? And do we reimburse more than €4,000 for this treatment? Then from 1 January 2027, you will need our approval for further treatment. Does your healthcare provider believe that follow-up treatment is medically necessary? Then you can submit an application together. We will assess this application based on the treatment guidelines of the professional association.

Good news: With retrospective effect from 1 January 2026, you do not pay any mandatory or voluntary excess for:
